Ban on Mercury Thermometer Sales

Mercury is a heavy, silvery-white liquid metal used in a variety of household products such as barometers, thermometers and fluorescent light bulbs. It is highly toxic and can have severe effects on humans such as allergic reactions, negative reproductive effects or brain damage.

The sale of mercury-type measuring devices has been restricted by the European Union as of 3rd April 2009 (Directive 2007/51/EC).

What to do with your old mercury thermometer?

Due to mercury's high toxicity, mercury thermometers must be recycled and not discarded!

If you are unsure about how to recycle your thermometer or any other mercury containing devices, please contact your local authorities for advice.

They will also inform you of your nearest household hazardous waste collection site and additional recycling initiatives in your area.

OMRON's eco-friendly digital thermometers - tradition since 1972

Protect yourself and the environment and replace your old mercury thermometer with a new digital one!

Our new range:

10 sec* - Flex Temp Smart

A Good Sense of Health

OMRON

Prevention is not only OMRON's key in healthcare, but also our approach towards society and the environment

OMRON Healthcare is a manufacturer of medical equipment for health monitoring and therapy with a wide range of products including blood pressure monitors, electronic fever thermometers, respiratory therapy devices, step counters and body fat monitors as well as professional medical devices.

With OMRON's Corporate Core Value of **'WORKING FOR THE BENEFIT OF SOCIETY'** it is our mission to provide healthcare devices that help you know your body's signals and find your balance.

At the same time we want to show responsibility towards our customers, society and employees. It is our desire to contribute to environmental protection by providing eco-friendly products and eco-management systems.

Let's work together and hand over a green planet to our children.

Responsibility towards customers, society and employees

OMRON Healthcare is dedicated to improving customer service by offering a worldwide personalized user support together with its business partners.

We are also committed to community involvement through product donations and awareness-raising initiatives for promoting health.

In 1972 OMRON Taiyo Co., Ltd. was established in Beppu as the first factory in Japan run by physically challenged people.

This is an example for how OMRON as a whole is dedicated to helping physically challenged individuals find employment opportunities and achieve independence.

OMRON values the individuality and diversity of its employees and strives to provide all people with equal opportunities in the workplace.

Eco-OMRON to realize a sustainable society

With Kyoto headquarters, OMRON Matsusaka and OMRON Dalian earned ISO14001 certification for environment management systems. They were established to promote the reduction of negative environmental factors and the prevention of environmental pollution.

Creating eco-friendly products to hand over a green planet to our children

OMRON Healthcare launched a certification system for products satisfying a high standard of environmental impact. They are indicated by OMRON group's own 'eco-labels'.

Examples of our certified 'eco-labels' are :

-  Energy Saving
-  Recycled
-  Zero use of environmental pollutants in OMRON products (RoHS directive)*
-  Products satisfying two or more criteria

* applicable to all electronic devices, however, medical devices are currently exempted

Protect yourself and the environment: A selection of our eco-label products

RoHS compliant

Our continuing efforts to abide by RoHS directive with our unique R&D and production systems

Blood Pressure Monitors MIT Elite Series

OMRON Nebulisers CompAir™ Series

Portable ECG device HeartScan HCG-801

Body Composition Monitors BF510

Energy saving

Uses 55% less power than previous stepcounters

Stepcounters Walking Style One

RoHS compliant & Energy saving*

HEM-Solar - Blood Pressure Monitor operated by solar charged battery, AC adapter or standard batteries*

* No/Less use of dry batteries – 80 batteries can be saved in a whole product lifecycle
